

## Notice from Freeport LNG

This is to inform you that the Regas facility has several planned/scheduled activities that may require some intermittent venting of our LNG tanks (1&2). The timeframe is as early as today (3-27-19), and continuing through Sunday (4-1-19). As noted above this is planned work.

Should there be any changes in the schedule or any other associated event we will communicate with you immediately.

Thank You

Robert Pate
